Dear Residents,

We wanted to inform you that the next phase of stormwater infrastructure repairs **(sub surface pipe replacement)** is scheduled to begin on **June 16**, starting in the **Micanopy/Narragansett area**.

This work marks another step in the community's broader effort to improve longstanding drainage issues.

The first section includes a known dip in the roadway that presents both functional and liability concerns.

⚠️ What to Expect:

- Construction crews and equipment will be active beginning June 16.
- Please use caution when driving or walking in the affected areas.
- Detour signage will be placed where necessary. In locations where a detour is not feasible, the contractor and the Board are coordinating safe temporary access solutions.
- Utility marking flags and paint will begin appearing in advance of the work**.** Please ensure these are **not removed or disturbed**, as they are essential for locating underground utilities safely. This includes reminding children not to touch or remove any markers.

Further details and updates will be provided as we get closer / the work progresses.

Thank you for your continued support and patience as we carry out these essential repairs. If you have any questions, please reach out via the resident portal or respond to this email
